

The complete telehealth solution

Teladoc is the first and largest provider of telehealth medical consults in the United States. We provide our members with 24/7/365 access to a board-certified physician through the convenience of phone and video consults.

There are many reasons to choose telehealth:

Save money

Employees may turn to the emergency room or urgent care center when their physician is unavailable. Teladoc reduces these costly and unnecessary visits by providing convenient access to an affordable health care option anytime your employees need care.

Offer quality care

All Teladoc physicians are U.S. board-certified, licensed in their respective state and average 15 years of practice experience. Employees can rest assured that they are speaking with an actual physician who can resolve many of their medical issues.

Increase satisfaction

At \$40 or less per consult, your employees will save money for quality medical care. They will also save time otherwise spent driving to a hospital and sitting in a waiting room. With Teladoc, employees can talk to a physician from anywhere, even from work or home.

Easy setup

Teladoc provides a quick and easy implementation and a seamless integration. Have your account set up within a month, any time of the year, and start realizing cost savings immediately.
